

PLASTIC DEBURRING

CO₂ Blasting and Cooling for Burr Removal

Why CO₂ Deburring?

- Safe
- Hands-Free
- Fast
- Consistent
- Precise
- Clean

How Does It Work?

Using high-speed dry ice, or CO₂ snow particles to blast away material. After impact, the dry ice instantly turns to gas, leaving behind no cleaning residue.

BEFORE

AFTER

Works **in-process** during machining to **eliminate burr formation** or **post-machining** to clean up edges free of burrs!

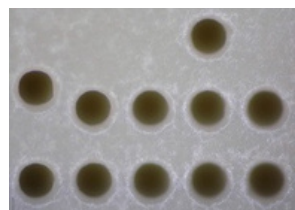

Check It Out!

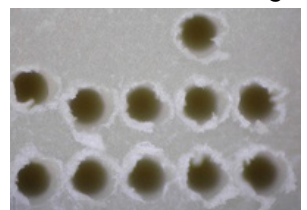

Successful Applications:

- PEEK
- Nylon
- Acetal
- Polycarbonate
- Other Thermoplastics

Before

After CO₂ Deburring

*Capable of **blind hole deburring**
